

JX AUTOMOTIVE FASTENERS SERIES

Q657 Flared Couplings - Male Branch Tee - Body

Material: Steel, tensile strength not less than 372MPa.
Thread: tolerance 6g, standard GB/T 196, GB/T 197
Surface treatment: zinc passivation QC/T 625
Remarks: There should be no cracks, pores, burrs, sharp edges, rust spots and other defects that affect the use.
Acceptance inspection: According to GB/T 90.1, the thread size AQL=1.5, the flare end size AQL=1.5, and the other sizes AQL=4.0.
When there are special requirements, both parties shall negotiate.

JX AUTOMOTIVE FASTENERS SERIES

Q660 Flared type tube fittings-inverted flare bolts

Material: Steel, tensile strength not less than 372MPa.

Thread: tolerance 6g, standard GB/T 196, GB/T 197

Surface treatment: zinc passivation QC/T 625

Remarks: There should be no cracks, pores, burrs, sharp edges, rust spots and other defects that affect the use.

Acceptance inspection: According to GB/T 90.1, the thread size AQL=1.5, the flare end size AQL=1.5, and the other sizes AQL=4.0.

When there are special requirements, both parties shall negotiate.
